ILO Committee Meeting

1. Want to meet with Gary Rodwell regarding STAR and the possibilities for visualizing the ILOs
2. Students do not have a format with which to interface with. Until we know how the ILOs can be met, it is hard to know what would work. Barometer would have to identify every course and its links to the ILOs. ILOs mapped to gen ed. programs first and then that could be integrated into the system.
3. What is still not directly dealt with?– civic education, those not specifically linked to degree programs.
4. How do we make sure that the ILOs attached to Gen Ed are reportable to banner or star? No general education course advertises or does anything with the ILOs. Could we have a test department/major?
5. Discussed the need to meet with co-curricular programs, especially dealing with issues of civic engagement.
6. Wendy updated us on the WASC essays that are due. We will contribute to this process. Our deadline is Dec. 15th.
