move with aloha
University of Hawai‘i at Mānoa

>>Campus Map Inside<<
Hawai‘i is like no other place on earth…

and in the spirit of the islands, the University of Hawai‘i at Mānoa (UH Mānoa) promotes “living aloha” by encouraging the practice of being considerate of each other and sharing our valuable resources.

UH Mānoa acknowledges the advantages associated with the use of non-motorized vehicles (bicycles, skateboards, etc.) as a means of convenient and energy efficient transportation on campus. The following initiatives have been identified to ensure the welfare and safety of our campus community engaged in mixed modes of transportation and to promote a pedestrian-friendly campus:

1. Share Zones
2. Sharrow Lanes
3. Bike routes
Share Zones

“Share Zones” have been created to identify heavily populated pedestrian traffic areas around campus and are designated by pavement markings for easy identification. During periods of high pedestrian foot traffic, bicyclists, skateboarders, and persons on other modes of transportation are required to dismount and to walk their wheels through these designated areas to ensure everyone’s health and safety.

– Ride and Walk with Aloha.

Under Phase I of this program, the four (4) areas designated as “Share Zones” are the following:

- McCarthy Mall and walkway in front of the Art Building
- Sustainability Courtyard
- Legacy Path and Law Plaza
- Athletics Complex including Gym 1 and Gym 2

Refer to “yellow areas” on attached map for “Share Zones.”

Sharrow Lanes

“Sharrows” are pavement markings indicating a travel lane shared by motorists and bicyclists. In a shared lane, bicyclists should position themselves appropriately (away from parked cars, passing other cyclists, avoiding potholes, etc.) in the same direction as traffic. Motorists should slow down and pass with care if bicyclists are present – Drive and Bike with Aloha.

Refer to “green routes” on attached map for “Sharrow Lanes.”
Bicycle Routes

To ensure a safe commute to and from campus, bicycle routes have been designated by signage where currently recognized. Additional routes will gradually be included as the university works with the City & County of Honolulu and the State on Oahu’s bike plan. Refer to “blue dashed lines” on attached map for bike routes currently recognized.

Reminder

To protect the safety of persons and property, the use of bicycles, skateboards, rollerblades, and other forms of portable transportation may not be used in the following locations:

- Inside any building or university facility.
- On stairs, steps, curbs, benches, loading docks, walls, railings, and ramps.
- Near doors and entry ways.
- In courtyards.
- On athletic or recreational playing venues.
- Anywhere such activities are prohibited by signage.

Travelers engaged in these forms of transportation are expected to use them in a safe, responsible manner, giving pedestrians the right of way at all times. Excessive speeding, stunt riding, racing, or any other uses besides transportation purposes is prohibited.
For Motorists:
- Obey speed limits and traffic signs, signals, and lane markings.
- Yield to pedestrians, bicyclists, skateboarders, etc. when making turns.
- Slow down and pass with care if bicyclists are present.
- Do not use your horn in close proximity to bicyclists.
- Check for bicyclists and other traffic before opening doors.
- Watch for bicyclists and pedestrians at night.

For Bicyclists:
- Follow the same laws that apply to motorists.
- Obey traffic signals, signs, and lane markings.
- Always yield to pedestrians.
- Ride with the flow of traffic – never against it.
- Always wear a properly fitting helmet.
- Use recognized bicycle routes (see attached campus map).
- Ride predictably, assertively, and be alert.
  Use hand signals before turning.
- Be visible. If riding at night, use lights, reflectors, and bright clothing.
- Yield to motor vehicles, even when you have the right of way.
For Pedestrians:
- Be aware of others around you.
- Look both ways before crossing roadways and
  make eye contact with the driver when vehicles
  are present - ensure the driver sees you before
  crossing the road.
- Be visible. If walking at night, use lights
  and bright clothing.
- Yield to motor vehicles, even when you have
  the right of way.

Skateboard Safety Tips:
- Select an appropriate skateboard for your skill level.
- Learn how to fall to reduce the chance of serious injury.
- Never hitch a ride from a car, bicycle, etc.
- Look out for holes, bumps, rocks, etc. while riding.
- Wear appropriate safety gear – helmet, elbow,
  wrist, and knee pads.
- Look both ways and make sure it is clear before
  crossing roadways, intersections, and parking
  entrances and exits.
- Always yield to pedestrians.
- Be visible. If riding at night, use lights, reflectors,
  and bright clothing.
- Yield to motor vehicles, even when you have the
  right of way.
